

Participants for a scientific research.

Why do people protect the cultural heritage or the natural environment of Bonaire, St Eustatius and Saba?

The purpose of this research is to understand to what extent residents of the three islands play a role in protecting the local cultural heritage or natural environment. Findings from the study can help to understand if, how and why the different residents of Bonaire, St. Eustatius and Saba protect the cultural heritage or the natural environment of the island. To study this, island residents are asked to fill out an online-questionnaire.

To participate in this study, you:

- currently live on Bonaire, St. Eustatius or Saba;
- have been protecting the cultural heritage, and/or the natural environment of Bonaire, St. Eustatius or Saba for about half a day in the past six months.

Want to participate?

Go directly to the questionnaire by clicking [HERE](#) (Ctrl + click to follow link). The survey can be filled out in English, Dutch and Papiamentu.
