pembicara:

**Prof. Dr.
Fridus Steijlen**

Researcher at KITLV/
Vrije Universiteit Amsterdam

In this public lecture Prof. Dr. Fridus Steijlen will talk about his experience as an anthropologist getting involved in oral history projects. A key to this bridge for him was the historical dimension of the Moluccan presence in the Netherlands, connecting postcolonial with colonial. Based on his personal experiences he will talk about the different approaches in oral history land and the value of oral history approaches for social science as well as for history.
